Introduction to Aiven

Aiven provides fully-hosted and managed cloud database and messaging services on all major cloud providers across the globe.

Multiple services for various database needs

Used alone or in an integrated manner, our premium open-source services cover all of your database needs.

PostgreSQL

With advanced features and high-availability plans.

Kafka

Aiven Kafka plans are highly-available and full-featured.

Elasticsearch

Elasticsearch is best for full-text search and log management.

Cassandra

Lorem ipsum dolor sit amet, duo an offendit eleifend

InfluxDB

Aiven InfluxDB is best used as part of our service integrations.

Redis

Redis is offered in multiple plan sizes, including high-availability.

Grafana

Visualize your data in real-time with Aiven Grafana.

What we'll talk about today

- Why asynchronous communication?
- Setting up Aiven Kafka
- Introducing the iBeacon
- Setting up your Producer
- Setting up your Consumer
- Running it all together
- Wrapping up...

Thanks!
